

~~SECRET~~  
CONFIDENTIAL

Chief, Far Eastern Section, Interdepartmental  
Coordinating Office, CAD, Department of the Army

18 February 1949

Chief, FBIS

Radio Broadcasting and Monitoring Activities on Okinawa

- REFS. : a. Memorandum dated 5 January 1949 to Chief, Far Eastern Section, Interdepartmental Coordinating Office, CAD, Department of the Army, from Chief, FBIS, subject: Radio Broadcasting and Monitoring Activities on Okinawa
- b. Radio WARI 82463 dated 8 January 1949 from Department of Army to CINCPAC, Information COMGEMRYCON
- c. Radio CX 67306 dated 24 January 1949 from CINCPAC TOKYO JAPAN to CG RYCON, Information Department of Army
- d. Radio CX 67674 dated 8 February 1949 from CINCPAC TOKYO JAPAN to Department of Army, Information COMGEMRYUKYUS

1. A study of Reference d has been made by this office and the following conclusions reached:

a. At the present time there appears to be in the 1400 KC area of spectrum only a marginal amount of material monitorable from the FBIS Bolo Point site and of interest to IAC consumers of the FBIS product.

b. Station AKAR at Imbhi, approximately seven airline miles from Bolo Point, using not to exceed 500 watts of power, and concentrating its energy in a NE-SW direction during the hours mentioned, would not cause objectionable interference to the FBIS operation which could not be overcome by proper engineering and careful coordination.

2. This office, therefore, interposes no objection to the plan outlined in Reference d provided:

a. Implementation of the plan is coordinated with the Chief, Okinawa Bureau, FBIS, and that any differences of opinion which cannot be satisfactorily resolved locally be referred to Washington for joint decision by Department of the Army and this office.

b. Activities not outlined in Reference d will be coordinated with this office before implementation.
